

CPSC Meeting

Ian Fisk
January 13, 2026

Response to the Genesis Mission

- Genesis Mission web page is here
 - <https://genesis.energy.gov>
- A careful response is needed
 - On the surface pretty lab and industry focused
 - Very different pace from what we are used to
 - Heavy AI focus
 - A business-as-usual response is not likely to be successful

Responding

IRIS-HEP through the eco-systems workshop asked to host a writing exercise at the Simons Foundation
January 22nd and 23rd

- Their goal was to focus on experimental response

I would be happy to have a parallel effort on a theory response as well

- Could be about simulation or calculations
 - Clearly needs to be AI Focused

There will be the opportunity for remote participation also, though I am happy to cover expenses in NY

Subcommittee on Software Support

Response from Software Ecosystems workshop was mixed

I think the thing we really need is a crisp list of the software we are talking about

- Survey
- Categorize
- Estimate size of the effort
