CPSC Meeting

Ian Fisk
February 24, 2026

AI Strategy Paper

- HEP Strategy was posted to the arXiv
  - https://arxiv.org/abs/2602.17582

- In the end there are ~500 authors/endorses

- Parallel theory effort

- Simons Foundation is embracing their role as a convening organization

Software Survey

CPSC Nominations

Dear colleagues,

On behalf of the Coordinating Panel for Software and Computing (CPSC), hosted by the Division of Particles and Fields (DPF) of the American Physical Society, I invite nominations for new members to serve a three-year term on the Panel.

The CPSC strengthens and supports the software and computing ecosystem that underpins high-energy physics (HEP) research in the United States. The Panel brings together researchers, software developers, laboratories, universities, and industry partners to address shared challenges in computing, foster innovation, and coordinate community strategy. Its activities span community coordination, workforce development, recognition of software and computing contributions, and engagement with national and international initiatives.

We seek nominations of individuals who can contribute to the Panel's mission across the breadth of U.S. HEP software and computing. We particularly welcome nominees who bring experience in areas such as:

- Experimental or theoretical HEP computing and software
- Data management, workflow, and distributed computing
- AI/ML and advanced computing technologies (HPC, accelerators, cloud)
- Software sustainability, training, and career development
- Cross-disciplinary or industry collaboration

We also strongly encourage nominations that reflect the full diversity of the U.S. HEP community, including representation across experiments, institutions, career stages, and backgrounds.

Term and expectations

CPSC members serve a three-year term, participate in regular virtual meetings (typically every ~2 weeks), and contribute to Panel activities such as community reports, workshops, and coordination efforts.

Nomination process

Nominations should include:
- Name and affiliation of the nominee
- Short statement (≈200–300 words) describing the nominee's relevant experience and perspective
- CV or link to professional profile

Self-nominations are welcome.
